

AVerVision SPC300

Portable Document Camera

 folded view

Product Description

The AVerVisionSPC300 is a feature rich, yet easy to use document camera complete with standard presentation functions as well as advanced and exclusive features. The 3.2 mega pixel sensor produces the sharpest images available in its price range, while total 48 times zoom with auto focus clearly displays even the smallest details or text. Exclusive features not found on any other document camera include the AVerBox, AVerVisor and AVerPointer, designed to enhance or isolate any area or detail of a document or object. The included software not only allows for image and video recording with audio, but offers annotation features where users can type text of various colors, color fill, or freehand draw, to the live image. Captured images can be

audio, but offers annotation features where users can type text of various colors, color fill, or freehand draw, to the live image. Captured images can be viewed in thumbnails, full screen, in split screen with the live image, or with picture-in-picture with the live image. Able to integrate into most other classroom presentation products including interactive whiteboards, the AVerVision SPC300 can easily combine with other technologies. The included 360 degree access remote control allows presenters to control the AVerVision SPC300 from anywhere in the room. Optional laser positioning guides are available while optional microscope adaptors allow virtually any microscope to be connected to the AVerVision SPC300 to show the smallest microscopic detail on a large screen.
